Final year Computer Science Engineering Student

Technical Skills

Python

JAVA

C

Microprocessor

SQL

.NET

JAVA

VS Code

CSS

HTML

Visual Studio

Github basics

Data Structures

Subjects of Interest

Classic & Contemporary Literature

Fashion and lifestyle

Vision Led Brand Creation

Education

**B.Tech in Computer
Engineering**

**Toc H Institute of Science and
Technology**

2022-present

7.5 CGPA

Class 12

**Holy Family HSS
Cherthala**

2021

99.16 %

Class 10

**SSEMS Cherthala
CBSE**

2019

97.8 %

Languages

- English
- Malayalam
- Hindi(Read & Write Only)

Academic Projects

AI-Driven Player Performance Analyzer(mini project)

An intelligent platform that leverages AI and machine learning to analyze and predict athletic performance based on match or training data.

Tools: Computer Vision and Machine Learning

Course Management System

A full-stack web app built with ASP.NET MVC & Entity Framework. Manage Courses and Lessons via CRUD operations, role-based access, and a responsive Razor-view UI.

Tools: ASP.NET MVC

Dreamy To-Do App

A soft pink productivity app that transforms task management into a calming and joyful experience. The app includes editable titles for personalization, a celebration confetti animation on task completion, and rotating motivational quotes to encourage progress. Built using HTML, CSS, and JavaScript with data stored locally using LocalStorage.

Tools: HTML,CSS,Javascript

Masked Counseling App

Masked Counseling is a concept-driven mental wellness platform aimed at breaking the stigma around seeking help. The platform enables individuals to express themselves anonymously and receive support without fear of judgment. It is designed to encourage open emotional sharing, offer AI-driven mood insights, and potentially guide users toward healing.

Tools: HTML,CSS,Javascript

Microlearn — Personalized Learning (GDSC Ideathon)

Although I wasn't directly involved in the technical development of MicroLearn, being a part of the team gave me valuable exposure to how powerful ideas take shape. Watching my talented peers conceptualize and build an AI-powered MicroLearn which introduces a dynamic platform powered by AI where users can enter any topic, and the system deconstructs it into ranked subtopics. The platform fetches and summarizes high-quality content (articles, videos, docs), and delivers bite-sized lessons

Tools: Built with React and Node.js

Courses & Certifications

Google Cloud - Data Analytics Fundamentals

AI Product Development by Freston Analytics

Database and SQL by Infosys Springboard

TinkerHub - HerHack 3.0

Techfoss volunteering 2024

Introduction to Frappe Framework

dotNET Web Development

Soft Skills and Leadership by Gooseberry Media

Digital Marketing Workshop by Emanate

Ideathon By GDSC

AI Hackathon By Udyama

Summit Of Future By Jain University

Multidimensional Data Modelling By Infosys
